

Bucks County Community College

Industrial Maintenance Training Program

Electro-mechanical Training

Training starts December 9th

Like to fix things? If you are mechanically inclined, like to work with your hands and looking for a quick-start career opportunity, this training program is for you! Workers skilled in industrial maintenance – electro-mechanical maintenance and repair – are in high demand, and Bucks County Community College has partnered with local employers to fill numerous positions.

This training is perfect for someone that wants to increase their skills and launch a career with a local employer. Bucks has fostered industry partnerships since the inception of the program in 2016 which has led to a consistent **90% job placement rate**. Because the instructors are industry experts with decades of experience in the field, they know what employers need and are committed to guiding students through the curriculum to success.

The Industrial Maintenance Training Program, a **recognized pre-apprentice program** through the PA Department of Labor & Industry, introduces participants to the fundamental concepts and hands-on skills required by electro-mechanical technicians in manufacturing and a variety of industries. Electro-mechanical technicians combine knowledge of mechanical technology with knowledge of electrical and electronic circuits. **Job duties** can include maintaining, troubleshooting and improving complex machines and industrial systems.

Earn stackable credentials and a certificate of completion as well as industry recognized credentials in OSHA10 and Forklift Safety Training certification. Training curriculum includes: basic electricity/electrical fabrication, electric relay control/PLCs, blueprint reading, mechanical fabrication, shop math & measurement, workplace and employability skills and personal finance.

Typical job titles include: industrial maintenance mechanic, maintenance/mechanic apprentice, maintenance assistant.

Anticipated average starting salary for program graduates: \$21+/hour.

Cost: \$6,500

(Training is free for those who qualify, including those who are unemployed or underemployed)
